## DETAILED ACTION

### *Priority*

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### *Specification*

2. It is requested that a status paragraph referring to the 371 status of the present application be added as the first paragraph of the specification..

### *Obviousness-type Double Patenting*

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-11 of U.S. Patent No. 6,300,330. Although the conflicting claims are not identical, they are not patentably distinct from each other because

overlapping subject matter is involved. Specifically, the claims of the patent generically encompass the present compounds and include the specific compound of the proviso clause of claim 1, i.e., a compound where D is 5-chlorobenzofuran-2-yl. Motivation to select the present compounds exists because of the patent definitions of A as heteroaryl, B as phenylene, X<sup>1</sup> as C(O), -T<sup>1</sup>(R<sup>2</sup>)-L<sup>1</sup>-T<sup>2</sup>(R<sup>2</sup>)- as piperazinyl, X<sup>2</sup> as SO<sub>2</sub> and Q as a heterocyclo group. Preferred subgroups thereof are present and of course, the compound where D is 5-chlorobenzofuran-2-yl is a simple halo analog and/or position isomer of presently claimed compounds. Note, further, the teaching of equivalency of unsubstituted and commonly substituted Q groups in the patent, which correspond to the D group of the present compounds.

***Different Inventive Entity, Common Assignee, Showing of Common Ownership***

5. Claims 1-18 are directed to an invention not patentably distinct from claims 1-11 of commonly assigned U.S. Patent No. 6,300,330. Specifically, overlapping subject matter is involved. See the rejection above.

6. The U.S. Patent and Trademark Office normally will not institute an interference between applications or a patent and an application of common ownership (see MPEP § 2302).

Commonly assigned U.S. Patent No. 6,300,330, discussed above, would form the basis for a rejection of the noted claims under 35 U.S.C. 103(a) if the commonly assigned case qualifies as prior art under 35 U.S.C. 102(f) or (g) and the conflicting inventions were not commonly owned at the time the invention in this application was made. In order for the examiner to resolve this issue, the assignee is required under 35 U.S.C. 103(c) and 37 CFR 1.78(c) to either show that the

conflicting inventions were commonly owned at the time the invention in this application was made or to name the prior inventor of the conflicting subject matter. Failure to comply with this requirement will result in a holding of abandonment of the application.

7. A showing that the inventions were commonly owned at the time the invention in this application was made will preclude a rejection under 35 U.S.C. 103(a) based upon the commonly assigned case as a reference under 35 U.S.C. 102(f) or (g), or 35 U.S.C. 102(e) for applications filed on or after November 29, 1999.

***Claim Rejections - 35 USC § 112***

8. Claims 6-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. (1) Claims 6-11 and 15-18 are multiple dependent claims improperly dependent on other multiple dependent claims. (2) Claim 15 is a substantial duplicate of the preceding claims since patentable significance is normally not given to use limitations in product claims. (3) Claim 17 provides for the use of the compounds, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced. Correction and/or clarification of the above are requested.
